

Schafer Liquid Kelp

0-0-1

Made with the hardiest plants on earth—Cold water North American Seaweeds. The Seaweed Extracts play a LARGE role in boosting stress tolerance as well as survival potential of plants under intense and seasonal stress when used in your soil management program.

Benefits:

- Significant improvement in resistance to diseases
- Significant improvement in drought and stress tolerance
- Increases photosynthesis and chlorophyll content.
- Improves plant health and physiological fitness.
- Enhances Fertilizer Uptake
- Aids in cell wall strength of plants.
